

SURGICAL PRACTICE SYSTEM

Eversight Surgical Practice System features the Barron Artificial Anterior Chamber (AAC), providing a life-like, responsive alternative to whole globes for practicing surgical techniques.

Better corneal clarity vs. whole globes

Outstanding visualization of anterior chamber depth.

Versatile with exceptional control

Multiple options for practicing surgical techniques including DSAEK, DMEK, and pre-loaded. Easily adjust anterior and posterior pressure. Each system includes one full-thickness cornea. Upon request, the tissue can be delivered preassembled on the Barron AAC.

On-Demand

Online ordering and instructional resources at eversightvision.org/sps.
