

BrightMEM™ Corneal Allograft Information Sheet

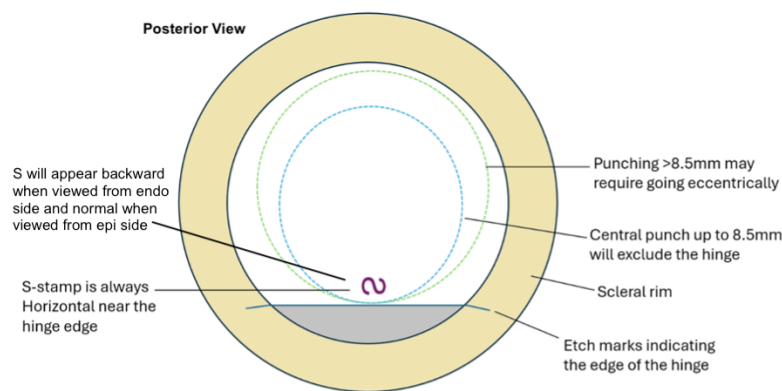

For Surgery Centers and Hospitals

About BrightMEM

BrightMEM is an innovative corneal allograft composed of Descemet's Membrane that promotes corneal re-epithelialization and functions as a robust basement membrane with natural long-term durability. This represents a new mechanism for treating impaired corneal healing.

BrightMEM Anterior Keratoplasty (BMAK) Procedure

- The packaging identifies the graft as Brightstar Therapeutics' BrightMEM corneal allograft for an ALK procedure.
- Allow the tissue to warm to room temperature (20°C–25°C) in its unopened tissue chamber for 1 hour prior to use.
- The BrightMEM allograft arrives attached to a full scleral rim in a corneal viewing chamber.
- Descemet's membrane has been peeled from the stroma up to the shaded hinged area, and the S-stamp is located close to the hinge, as shown here:

- Included with the BrightMEM allograft are the product insert and donor tissue information.
- Before performing the procedure, we encourage all surgeons to watch the training video and review the "Surgical Pearls" document for additional surgical advice from users, which can be found on our website at www.brightstartx.com/surgeontraining.
- If you have questions about the tissue, please reach out to Lions Gift of Sight at 612-624-0433.

How Should We Bill for This Procedure?

- The procedure should be coded as a Lamellar Keratoplasty-Corneal Transplant (65710).
- ASCs should bill the allograft as a pass-through at invoice cost (V2785).
- Hospitals should submit charges using HCPCS code V2785 (Status indicator "F"), which indicates that the corneal tissue is not paid under OPSS but is reimbursed at a reasonable cost.

What Happens if the Surgical Procedure is Canceled or Rescheduled?

- If you must cancel, immediately reach out to Lions Gift of Sight at 612-624-0433 to discuss the return procedures.

Who Should I Contact if There Are Issues with the Delivery of the BrightMEM Allograft?

- During business hours, contact Lions Gift of Sight at 612-624-0433.
- After hours or in case of emergencies, contact Brian Philippy, Director of Business Development at Lions Gift of Sight, at 757-636-5563.
